Fellowships & Awards

Dissertation Completion Fellowship, Harvard University, 2026-2027
Diversity Scholarship, American Society of Health Economics (ASHEcon), 2025
NBER Pre-Doctoral Fellowship in Aging and Health Research, 2024-2025
National Institute of Mental Health (NIMH) Pre-Doctoral Traineeship, 2021-2023
Graduate School of Arts and Sciences Prize Fellowship, Harvard University, 2021
New American University, President's Award, Arizona State University, 2011-2014

Teaching

GHHP 20: Maternal and Reproductive Health and Health Policy (Harvard College)
Teaching fellow for Professor Jessica Cohen (Spring 2024, Spring 2025, Spring 2026)

GenEd 1079: Why is There No Cure for Health? (Harvard College)
Head teaching fellow for Professor David Cutler (Fall 2025)

Research Experience

Research Assistant to Professor David Cutler and Professor Ellen Meara
National Bureau of Economic Research, 2022-2024

Research Assistant to Professor Michael Barnett and Professor Anna Sinaiko
Harvard T.H. Chan School of Public Health, 2018-2021

Research Assistant to Professor Katherine Coffman and Professor Christine Exley
Harvard Business School, 2016-2018

Job Market Paper

Mental Health Care After Clinicians Transition to Self-Pay: Evidence from Medicare
Clinicians are increasingly leaving health insurance networks and entering self-pay arrangements, yet little is known about how these transitions affect patients. I study mental health clinicians who formally opt out of Medicare, using a novel dataset of clinician opt-out dates linked to claims from a

20% random sample of fee-for-service Medicare beneficiaries. I compare patients of opt-out clinicians with patients of observably similar clinicians who do not opt out of Medicare using a matched, stacked difference-in-differences design. Following opt-out, Medicare-billed mental health visits decline by 18%, while the volume of psychotropic medication fills remains largely unchanged. Patients initiate new relationships around the transition with clinicians whose treatment capabilities resemble those of their opt-out clinician, and mental health care within those relationships increases after the clinician opts out. Psychotropic prescribing from previously seen mental health prescribers and established primary care providers also increases. However, increases in visits with other clinicians do not fully offset the decline in billed visits from the opt-out clinician. Acute-care use increases around the opt-out transition, but differential pretreatment movement warrants caution in interpreting those estimates.
